Installation Manual

System Requirement

HomeCare is an application that can run on an Android phone with at least Android 4.0.3, preferable with internet access in order to have access to all features. The size of this application is 2.07MB.
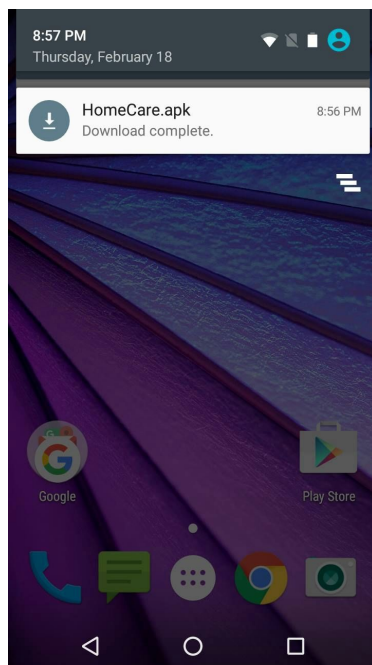

Install HomeCare

Step 1:
Download the app from the GitHub uwcse481h2016/HomeCare repository (LINK TO DOWNLOAD). Download the apk directly to an Android device or transfer it from your computer.
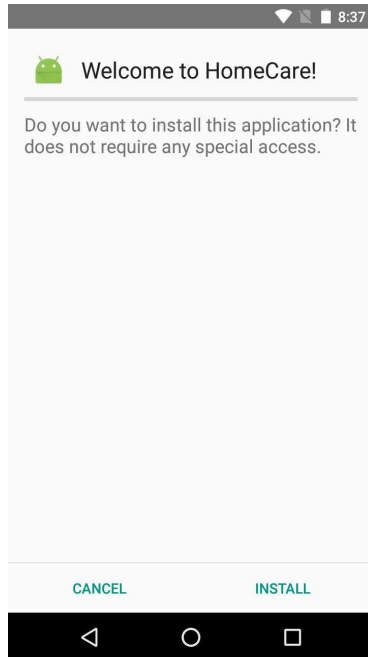

Step 2:
After successfully downloading the apk, open the file named HomeCare.apk.

Step 3:
After opening the HomeCare.apk, an installation page will show up. In order to install HomeCare, click on "INSTALL".

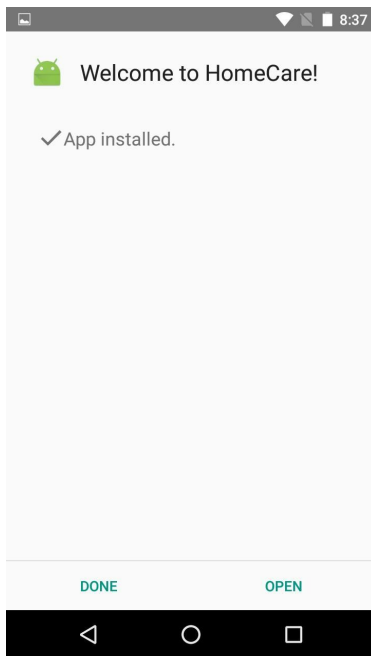

Step 4:
The app is now installing on your Android device.

Step 5:

The device will tell you that the installation was successful.

Step 6:

Click on "DONE" or "OPEN". If the "OPEN" button is clicked, the main menu for the HomeCare application will show up.
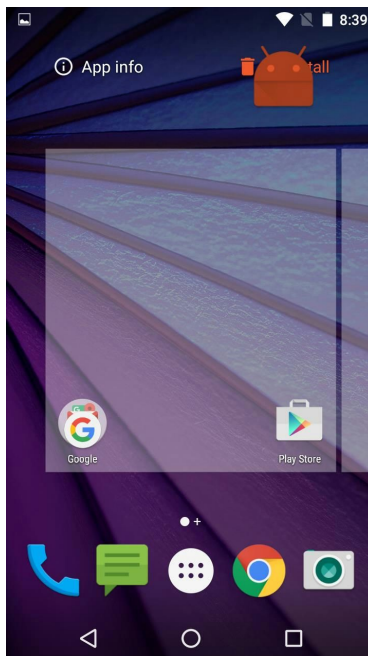

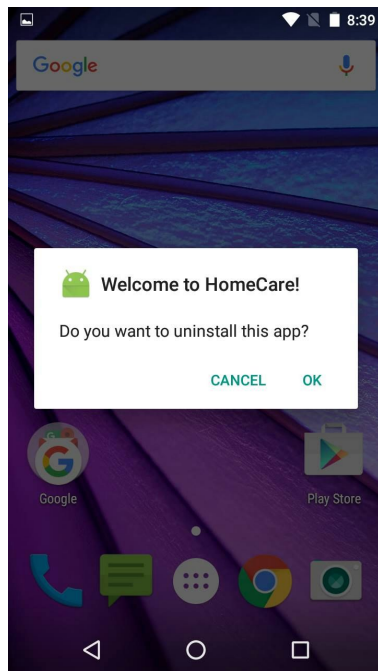

Uninstall HomeCare

To uninstall the app, long press the HomeCare app icon.

Drag the icon to "Uninstall" on the top.

A pop up window will show up, to confirm that you want to uninstall the app.

Click "OK" to uninstall.
